Biswas Sekhar

Full-Stack Software Developer

+91 79079 99106 | biswas.siv@gmail.com | Idukki, Kerala, India
linkedin.com/in/biswas-sekhar | github.com/BiswasSekhar

PROFESSIONAL SUMMARY

Full-stack software developer who builds educational software, games, and AI-assisted learning experiences. Strong foundation in object-oriented programming with Java, Python, and C++, plus cross-platform mobile development for Android and iOS. Comfortable owning products from interface design through backend services, AI workflows, and deployment.

TECHNICAL SKILLS

Programming & OOP: Java, Kotlin, Python, C++, C, Rust, JavaScript, TypeScript, SQL, HTML, CSS
Frontend: Vue.js, React, Next.js, Astro, Tailwind CSS
Backend & APIs: Frappe Framework, Node.js, FastAPI, Flask, Axum, REST APIs
Data, Cloud & AI: Neon, PostgreSQL, Prisma, Supabase, Firebase, MongoDB, Cloudflare, Gemini API, Groq API, PyTorch, Google Cloud Platform, AWS
Mobile Development: React Native, Kotlin, Flutter, Capacitor, Android, iOS builds
Developer Tools: Git, GitHub, VS Code, Figma, OpenCV, Docker, Tauri, FFmpeg

PROFESSIONAL EXPERIENCE

Full-Stack Developer — 2025 - Present

Comini Learning

- Develop educational software and learning experiences using Vue.js and Frappe Framework, contributing to the platform's core product engines.
- Built a multi-agent AI pipeline that generates curated student reports and learner activities, producing contextual text, images, and audio on demand.
- Delivered media-gallery uploads, Google upload workflows, annotation tools, attendance tracking, checklist management, and an in-product AI assistant.
- Improved existing-site latency and helped build the core software systems that support learning workflows.

Software Engineer — 2024 - 2025

Talent Deals

- Redesigned the company website with a focus on clear user journeys, responsive behavior, and a polished visual system.
- Structured company data to support reliable content management and scalable application development.

PROJECTS

Panam - Smart Expense Manager — panam.work

Expo, React Native, Firebase, Cloudflare, Gemini API, Groq API

- Built a cross-platform expense manager with bank-statement import, cloud synchronization, and AI-assisted statement parsing.

Rekha - AI PDF Utility

Flutter, OCR, AI Translation, Android

- Developed an ad-free Android PDF application with compression, conversion, reading, OCR, AI translation, chat, and summarization features.

StackSwipe - AI-Powered Developer Social Platform

Next.js 14, React 18, TypeScript, Tailwind CSS, Prisma, PostgreSQL, Groq API

- Built a subject-based social platform where AI agents generate persona-led posts and stories, while users comment, message, and explore engineering tools and topics.

StreamSync - Peer-to-Peer Watch Party

Tauri, Rust, React, React Native, FFmpeg, WebRTC, Axum, WebTorrent, Cloudflare Tunnel

- Created a serverless, anonymous watch-party system with fast fragmented-MP4 streaming, synchronized playback, video calls, and real-time chat across web and mobile receivers.

PROJECTS (CONTINUED)

Cairn - Multi-Tenant AI Work Management Platform
AI Agents, Vector Search, Slack, Google Calendar
- Built a ClickUp-like multi-tenant platform with AI planning, progress tracking, vector-based capabilities, integrations, and detailed weekly reviews.

StreamDeck - Android TV Streaming Discovery App
Kotlin, Python, Docker, Web Scraping, Cloudflare
- Built an Android TV application that brings the latest releases from multiple OTT platforms into one discovery experience and deep-links viewers to the selected streaming service.

CCRAGBot - Coaching Center Knowledge Assistant
Python, RAG, Vector Search, AI
- Developed a retrieval-augmented generation chatbot that answers questions using a coaching center's own knowledge base and vectorized source content.

Yeah - Malayalam Fact-Checking Platform **2024 - 2025**
React, FastAPI, Supabase, Python, PyTorch, Tailwind CSS
- Built a Malayalam-first fact-checking platform that helps users assess the credibility of news content through an accessible web workflow.
- Implemented data preprocessing, model training, and evaluation for fake-news detection; integrated the machine-learning capabilities into the application.

Additional projects: VVPREFAB - freelance React website deployed on Cloudflare; Form - AI fitness application for calorie tracking, gym-machine analysis, and personalized workouts.

EDUCATION

Bachelor of Technology in Information Technology **2021 - 2025**
Government Engineering College, Idukki
CGPA: 6.9

Higher Secondary Education - Computer Science **2019 - 2020**
Model Technical Higher Secondary School, Kaloor
Grade: 80%

Secondary Education **2018**
Vyasa Vidyalaya, Palachuvadu, Kakkanad
Grade: 82%

LEADERSHIP & ACHIEVEMENTS

- **Campus Lead, Google Developer Student Clubs** (Aug 2023 - Sep 2024) - Led developer-community initiatives, workshops, and hackathons; introduced Google Cloud to 150+ students through the Google Cloud Study Jam.
- **IEEE CSKS** - Electronics Communication Coordinator (Feb 2024 - Feb 2025) and Associate Graphic Designer (Feb 2023 - Feb 2024); managed communications, technical presentations, and event visuals.
- **IEDC GECI** - Chief Technical Officer (Mar 2023 - Feb 2024) and Chief Creative Officer (Sep 2022 - Mar 2023); led project planning, cross-functional coordination, and creative strategy.
- **Technical Lead, TinkerHub** (Feb 2022 - Mar 2023) - Oversaw technical planning, workshops, hackathons, and peer mentoring.
- **State Winner, YIP 4.0 Ideathon** - Kerala government ideathon, 2023.

VOLUNTEERING & INTERNSHIPS

- **Program Executive, STEYP** (Apr 2023); **IEEE Volunteer** - AICSSYC '23 Coordinator, AKCSSC '23, AICSSYC '24; internships at YIP (Jun - Aug 2023) and GTech Mulearn (Jun - Jul 2024).
